Duo-Dispenser

An easy-to-use receptacle is required to hold the topclass sorbent **Chem-Sorb** after an oil accident or any other leak in a factory, on farmyard, road or service station areas so that it can be re-used.

You achieve cost-efficiency down to the last grain with the time-tested mobile storage container (**Duo-Dispenser**).

The Duo-Dispenser consists of 2 chambers. One chamber is filled with new fresh material. The empty chamber is covered with a sieve. The used oil sorbent is passed through this sieve to filter out coarse fractions.

In this way **Chem-Sorb** can be used alternately until the material is saturated (dark discoloration) and has to be disposed of.

Dimensions: approx. L x W x H: 70 x 40 x 73 cm

Weight: approx. 32 kg

Capacity: approx. 3 x 10 kg Chem-Sorb

The handy, smooth-running dispenser is made of metal.

The Duo-Dispenser is an economic contribution towards environmental protection and safety at the workplace.
